DETAILED ACTION

The previous Office action dated on 5/4/2006 has rejected claims 21-39, and allowed claims 1-6, 8-11, and 15-20. Applicant has canceled claims 21-39 by the Amendment filed on 8/4/2006.

Response to Amendment

The Amendment by Applicants' representative Jennifer P. Yancy dated on 8/4/2006 has been entered.

Reasons for Allowance

The present invention is directed to a method for removing acrolein from a process stream comprising (a) providing a process stream comprising acrolein; and (b) reacting said acrolein in the presence of an acid catalyst with a scavenger compound containing a reactable thiol or hydroxyl moiety to form an acrolein derivative in a refined process stream. The closest prior art reference of record is U.S. Patent 4,625,059 (Shibano *et al.*).

U.S. Patent 4,625,059 (Shibano *et al.*) discloses a method of purifying a 1,2-unsaturated carboxylic acid and or esters thereof by removing the aromatic aldehyde impurity (e.g. furfural and benzaldehyde) with a mercaptan compound at 20-120 °C in the presence of an acid catalyst. This prior art reference is distinct from the instantly claimed process because the aldehydes intended to remove are different. The Shibano aromatic aldehydes (e.g. furfural and benzaldehyde) are different from the

instantly claimed non-aromatic aldehyde (e.g. acrolein) in terms of activity toward mercaptan. Therefore, claims 1-6, 8-11, and 15-20 are allowed.
